SUMMARY

Full Stack Developer and Backend Team Lead with 3+ years of experience in building scalable, high-performance web applications. Proficient in designing backend architecture, optimizing databases, and leading development teams. Passionate about problem-solving, collaboration, and delivering seamless user experiences.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, Node.js, Express.js, React.js, Next.js

Databases: MongoDB, PostgreSQL

Version Control: Git, GitHub

Deployment & Tools: Docker, CI/CD, Cloudinary

Others: REST APIs, WebSockets, Authentication, SEO

PROFESSIONAL EXPERIENCE

Backend Team Lead

2022 – Present

Commuter, Riyadh, Saudi Arabia

Led the backend development team for Commuter, an Uber-like ride-sharing platform. Designed and built the entire backend architecture using the MERN stack and TypeScript. Developed real-time features like live location tracking and chat using WebSockets. Optimized database performance and implemented advanced MongoDB querying. Collaborated closely with the frontend and product teams to deliver seamless user experiences. Integrated Docker for containerization and streamlined deployment processes.

SOFT SKILLS

Leadership: Proven ability to lead and mentor a backend development team.

Problem Solving: Strong analytical skills to troubleshoot and optimize backend systems.

Communication: Effective collaboration with cross-functional teams.

Time Management: Ability to prioritize tasks and deliver projects on time.

Adaptability: Quick learner, staying up to date with the latest tech trends.

Attention to Detail: Ensuring code quality, scalability, and performance.

EDUCATION

Bachelor's Degree in Computer Science

Mansoura University, Mansoura, Egypt

PROJECTS

Loom Store

2024

Full-stack e-commerce platform with high-performance and SEO optimization

Commuter

2022 – Present

Complete backend development for a ride-sharing platform
